ABSTRACT OF STATISTICS

1971 & '72

**Bureau of Statistics and Evaluation
Government of Pondicherry**

INTRODUCTION

The present issue of the Abstract of Statistics 1971 & 72 is the tenth in the series. It presents statistics on the various facets of economic and social structure of this Union Territory in a time-series with region-wise data for the latest year.

2. The reference period of the data appearing in this issue varies with the nature of the subject. Generally data have been presented for the financial years 1970-71 and 1971-72 or the calendar year 1972.

3. The figures including the totals, have been rounded off neglecting less than half and taking half and more than half as one. Wherever a total differs from the sum of individual figures, the difference, except where otherwise stated, may be taken to be due to such rounding off.

4. The valuable co-operation extended by the Heads of Departments, Mayors of Communes and members of the public in the collection of data appearing in this issue, is gratefully acknowledged.

5. Suggestions, if any, for the improvement of this publication, will be gratefully accepted.

2. CLIMATE

Statistics relating to rainfall, temperature and relative humidity are presented in this section.

Table 2.1 to 2.5: These tables show the annual and seasonwise rainfall in Pondicherry, Karaikal, Mahe and Yanam for the years 1950-51 to 1971-72 (June to May). The data have been compiled from the monthly returns received from the Public Works Department, Pondicherry. For seasonwise rainfall, the year has been divided into 4 periods; South West Monsoon (June to September); North East Monsoon (October to December); Winter (January to February) and Hot Weather (March to May). Normal rainfall is the simple arithmetic average of data for 30 years 1930-60 (June-May). Figures have been given in millimetres and inches.

Table 2.6: This table gives the maximum, minimum and mean temperature at Pondicherry for the years 1954 to 1972. Figures are given in degrees Fahrenheit and Centigrade. Data regarding relative humidity have also been included in the table. Monthly figures have been given for the years 1971 and 1972.

4. AGRICULTURE

Figures given in this section relate to land utilisation, area irrigated by different sources, crop acreage and agricultural production for the years 1968-69 to 1971-72 (July to June). For the years 1970-71 and 1971-72 figures for each region have been given. The statistics in respect of Pondicherry region, Karaikal region, Mahe and Yanam Regions have been collected by the field staff of the Bureau by complete enumeration under the scheme "Collection of Agricultural Statistics". Statistics relating to the agricultural machinery and implements and agricultural wages are also included in this section.

Table 4.1: This table is devoted to land utilisation statistics. Generally, the standard definitions of the categories of land adopted in this table are those recommended by the Ministry of Food and Agriculture, Directorate of Economics and Statistics.

Table 4.2 shows data relating to net area under irrigation according to modes of irrigation, area irrigated with crops more than once during the year being counted once only. Area irrigated by spring-channels, ponds, etc. are included in 'other sources.'

Table 4.3: This table gives data regarding area under irrigation according to cropwise distribution. Irrigated area sown with crops more than once during the year is counted as separate area for each crop.

Table 4.4: This table furnishes information regarding area under all crops. Total area under crops irrigated and unirrigated is included in this table.

Table 4.5 gives data relating to the production of principal crops in this state. Production of each crop for the years 1968-69 to 1970-71 has been worked out separately for each region on the basis of the yield rates collected by the Field Staff and for the year 1971-72 production is worked out on the basis of yield rates furnished by the local Agriculture Department.

Table 4.6: This table furnishes information relating to number of agricultural machinery implements in Pondicherry, Karaikal, Mahe and Yanam. The figures are according to the Livestock Census 1972.

Table 4.7: Information regarding the average daily wage rates paid to agricultural and skilled labourers at Thirukkanur in Pondicherry Region for the years 1964-65 to 1971-72 is presented in this table.

6. PUBLIC HEALTH AND VITAL STATISTICS

This section is devoted to Medical and Vital Statistics. Information about the number of hospitals, dispensaries, beds and medical personnel have been furnished by the Director of Health and Family Planning Services. Data regarding number of births, deaths by causes and age groups have been compiled from the monthly returns sent by the Mayors to the Office of the Health and Family Planning Services.

Number of hospitals, dispensaries and beds is given in **Table 6.1**.

Table 6.2 shows the number of Medical personnel.

Table 6.3 furnishes information regarding progress of B.C.G. vaccination in each Region.

Number of cases treated in hospitals and dispensaries is given in **Table 6.4**.

Table 6.5 gives information regarding birth control statistics.

Table 6.6 shows the distribution of live-births, still-births and deaths by Regions

Table 6.7 presents live birth rate and death rate per thousand population and still birth rate per thousand live and still-births. The formulae used are as follows:

$$\text{Live-birth rate/Death rate } \left. \begin{array}{l} \\ \text{per 1000 population} \end{array} \right\} = \frac{\text{Total live-births/deaths} \times 1000}{\text{Estimated mid-year population.}}$$

$$\text{Still-birth rate per 1000 } \left. \begin{array}{l} \\ \text{live and still-births} \end{array} \right\} = \frac{\text{Total still-births} \times 1000}{\text{Total live-births} + \text{Total still-births.}}$$

Straight lines have been fitted up with 1963 as origin.

Table 6.8 deals with the number of deaths due to various causes.

Table 6.9 deals with the number of deaths by different age-groups.

14. INDUSTRY

This section deals with industrial production of some of the important industries of this State, namely, cotton, textiles, sugar, vegetable oils, oil-cakes, matches and country spirits.

Table 14.1 to 14.5 give statistical data relating to cotton textiles which have been taken from the Indian Textile Industry Statistical Bulletin issued by the Textile Commissioner, Ministry of Commerce and Industry. Table 14.1 gives the number of spindles and looms installed. Tables 14.2 and 14.3 include data relating to production of cotton yarn and cloth respectively, based on monthly average. Tables 14.4 and 14.5 provide data on cotton yarn delivered for civil consumption and cloth delivered for civil consumption respectively.

The New Horizon Sugar Mills, Ariyur, went into production during September, 1960. Table 14.6 gives the monthly production of sugar.

The data relating to production of vegetable oils and oil-cakes are being collected only from the mills which are power-driven situated in Pondicherry settlement. The data have been compiled from the monthly returns received from these mills and are presented in Table 14.7.

Production, sale and stock position in respect of handloom industry under co-operative fold have been given in Tables 14.8 and 14.9.

Production of matches is being compiled from the monthly returns received from the manufacturers and is set out in Table 14.10.

Table 14.11 furnishes data relating to production of country spirits by the Government Distillery, Pondicherry.

Data regarding the Annual Survey of Industries-1967 (Census and Sample factories) are furnished in Table 14.12.
